Figure 1. Phylogenetic tree of *Phlox* species based on the maximum likelihood method. The tree is rooted at the bottom left and branches out to the right. The species names are listed on the left, and the corresponding numbers (likely bootstrap values or posterior probabilities) are listed on the right. The tree is divided into several major clades, with some clades highlighted in red. The species names are in Japanese, and the numbers are in English. The tree is a complex branching structure showing the evolutionary relationships between the species.
